Not much to say here. He is really, really good. 89 will stand out and create some interest. 89 is physically more impressive than our 2010 keeper buck lamb and his sire. Ideal height/length ratio, great skeletally, large legs and feet, perfect balance, overwhelming muscle shape. His mother has generated \$17,000 on 5 head, she's just a 3 year old!

This sheep is headed to Sedalia because we are serious about obtaining one of those purple ribbon paint brands.
